**Plaintiff,**

v.

**No. 05-2605 JDB**

**INTEL CORPORATION, a Delaware  
Corporation,**

**Defendant.**

---

**DECLARATION OF RICHARD A. RIPLEY**

---

1. My name is Richard A. Ripley. I am over the age of 18 and competent to give testimony. If called upon, I would testify on the facts set forth in this declaration.

2. I am a partner at the law firm of Bingham McCutchen LLP. Bingham McCutchen is counsel to defendant Intel Corporation in the above-styled action.

3. According to its web site, [www.gartner.com](http://www.gartner.com), the Gartner Group is a provider of research and analysis about the global information technology industry. One type of data that Gartner tracks is annual worldwide shipments of Personal Computers ("PCs").

4. According to public news reports, Gartner provided the following data for worldwide PC shipments: 2002 – 148 million units; 2003 – 164 million units; 2004 – 187 million units. It also estimated shipments for 2005 at 202 million units. True and correct copies of these articles are attached hereto as Exhibits A and B.

5. According to these same articles, the units shipped in 2003 represent a growth of 11% over the shipments for 2002. See Exhibit A. Using that same growth rate for 2001-2002, one can estimate the 2001 worldwide PC shipments to be 133 million units.

6. Plaintiff Corey Wiles' ("Wiles") complaint allegedly covers PCs containing Intel microprocessors that were sold into the State of Tennessee from June 30, 2001 through to the present. (See Wiles First Amended Complaint ("FAC") ¶ 13).

7. Totaling six months of the 2001 estimate, 9 months of the 2005 estimate and the Gartner shipment data for 2002-2004 results in an estimated 716 million PC units shipped worldwide from June 29, 2001 to the present.

8. Wiles alleges that 32% of worldwide production of PCs are sold to United States consumers. (Wiles FAC ¶ 32). Using this allegation with the Gartner data results in an estimated 229,120,000 PCs sold to United States consumers during the specified time period.

9. Wiles also alleges that Intel had an average PC Unit Market Share from 2001-2004 of 81.9%. (See Wiles FAC ¶ 29). Using this allegation with the estimated U.S. PC shipments above results in approximately 187,649,000 PCs with Intel microprocessors shipped into the United States during the specified time period.

10. According to the U.S. Census, in 2001 61,473,000 Households in the United States had a computer; Tennessee Households account for 1.93% of those U.S. Households, or 1,189,000 Households. (A true and correct copy of this table from the U.S. Census Bureau's website is attached hereto as Exhibit C.) Applying this 2001 percentage (1.93%) to U.S. shipments of PCs with Intel microprocessors (187,649,000) results in an estimated 3,629,480 PCs sold into Tennessee during the specified time period.

11. If Wiles claims damages per computer of more than \$1.38, the aggregate value of those damage claims exceeds \$5 million based on the estimated data above.

Under the penalties of perjury, I declare that the foregoing is true and accurate to the best of my knowledge.

A handwritten signature in black ink, appearing to read "R.A. Ripley", is written over a horizontal line. Below the signature, the name "Richard A. Ripley" is printed in a standard font.

Dated: September 19, 2005
